Animal admission policy

Reserved the right to admit pets under the following points:

- We accepted dogs, cats and ferrets with charge.*
 - We accepted without charge and always with their cages: rabbits, hamsters, guinea pigs, etc. and birds, and tortoises.*
 - Regardless of their species, breed, size or any other consideration, animals are NOT allowed in the bungalows or on the terraces.*
 - The keeping of animals on the campsite is subject to the possession of a 24-hour contact telephone number, which must be provided at the time of check-in.*
 - All animals must be properly cared for by their owners. They may not be left for prolonged periods exposed to the sun or inclement weather, or left unattended, specifically at night and/or puppies.*
 - All pets must be properly leashed or caged at all times.*
 - Owners of animals that cause damage to other campers by their dangerous or noisy behaviour, etc. must provide an effective solution, under the possibility of being expelled from the campsite if they do not do so.*
- Species that are logically catalogued as non-domestic or dangerous are not allowed, even if they comply with all the protection measures, nor is the entry of any species of reptile or arachnid accepted, nor those not explicitly specified in this document as permitted.*
- If it is not possible to avoid the animal's physiological needs inside the campsite, the owner of the animal will be responsible for the cleaning of the campsite.*
 - Pets are not allowed in all the common areas of the campsite, except for the restaurant terrace, as long as their behaviour allows it. Animals may only stay in their own plots or in the plots where they are accepted and circulate in the streets of the campsite, properly leashed, to go for a walk.*
 - The owner of the animals must have the animal's health card up to date.*
 - Animals that show signs of illness or are in poor condition are not allowed, and must be rectified immediately by going to a veterinary centre for treatment.*
 - Owners of animals of dangerous breeds admitted in this document are obliged to have a valid and up-to-date licence for the possession of dangerous animals and all the documentation necessary to have it.*
